

New from Comprompter ...

Caption Central™ Version 2

Provides the Fastest and most accurate **Voice Captioning**:
It passes through the captioning from your **NewsRoom Computer System**, Live **Voice Transcription** is triggered with a single keystroke and **Keyboard ...**

Newsroom Captioning

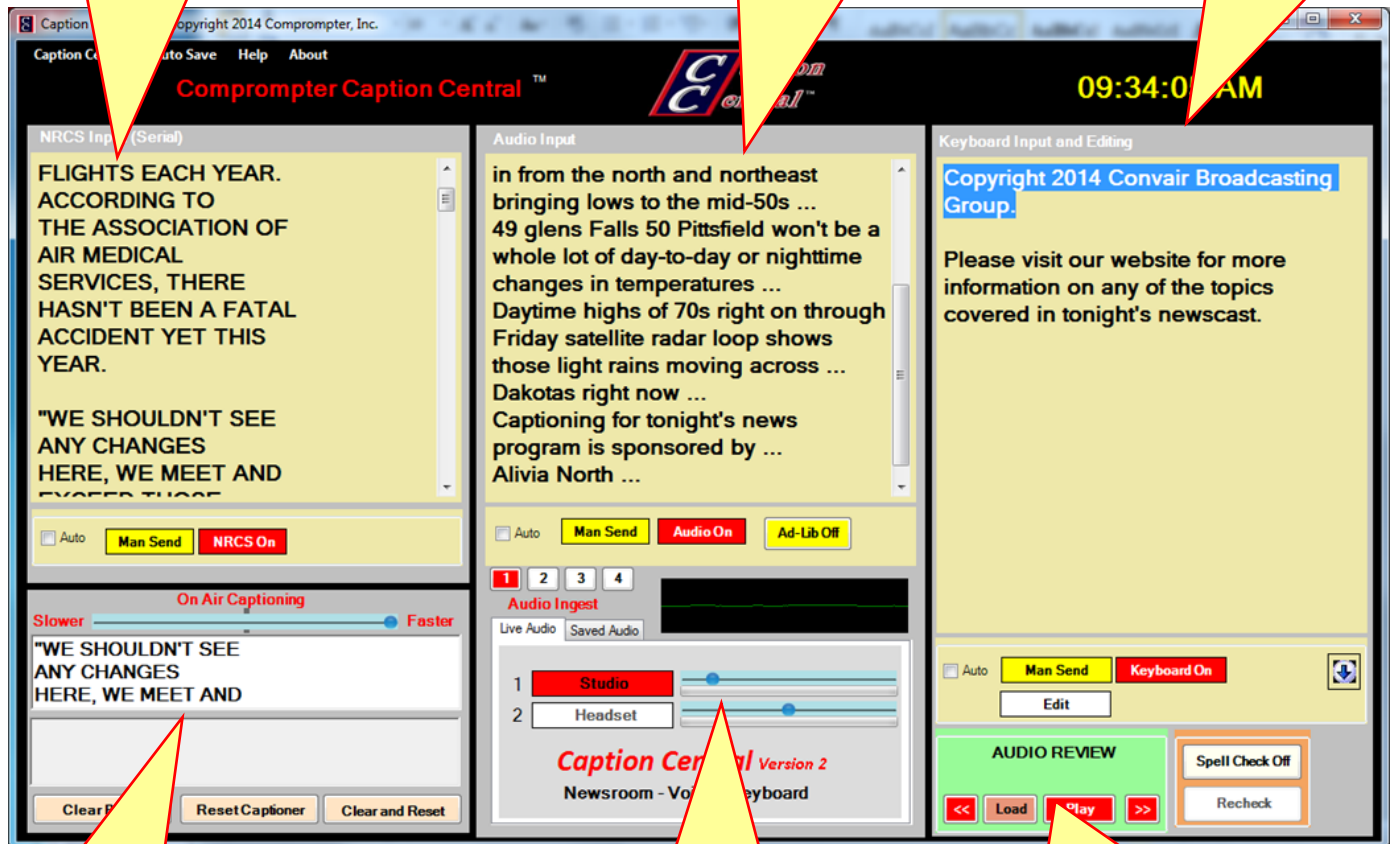

1. Captioning output from the station's NewsRoom Computer System (NRCS) appears here and scrolls up ... and out to the encoder

Voice Captioning

2. Voice Captioning is taken directly from the studio and the Transcribed Text appears here ... Touch the Ad-Lib button and the Audio Transcription goes directly to air

Keyboard Captioning

3. Text is typed in here and pre-stored. Files are called up here for output to the Captioner.
- This window is also used to load, review and edit previously transcribed material

On-Air Captioning

4. This window displays the text that is appearing on the Close Captioner at that moment

Audio In

5. Audio Volume levels are managed automatically

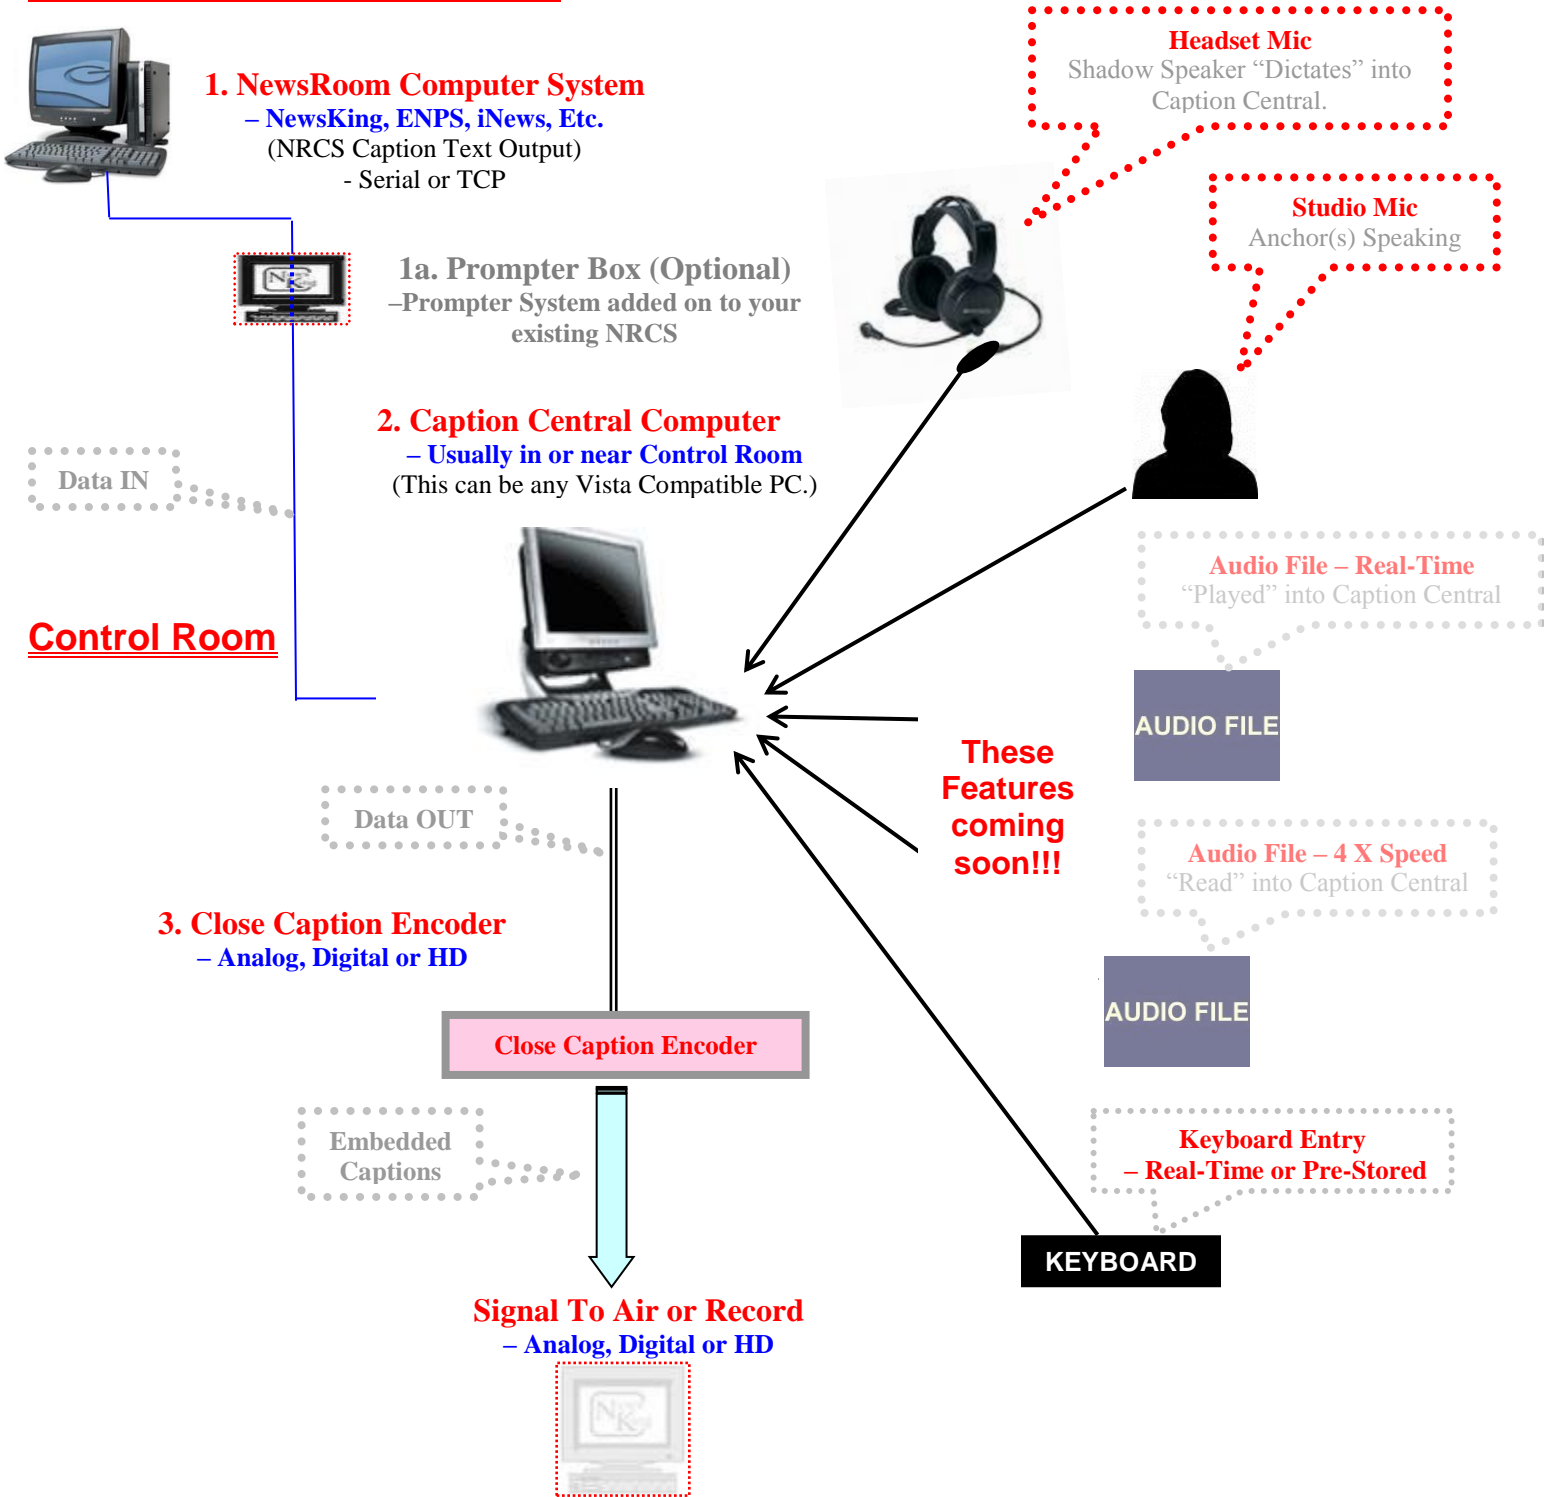

Audio Review

6. Audio playback used to compare to transcribed text to make corrections, and to add punctuation

... And remember ... *Caption Central works with any Newsroom System!*

Comprompter **Caption Central** – Typical Schematic Layout

NewsRoom Computer System (NRCS)

Caption Central is as Simple as 1 ... 2 ... 3!!!

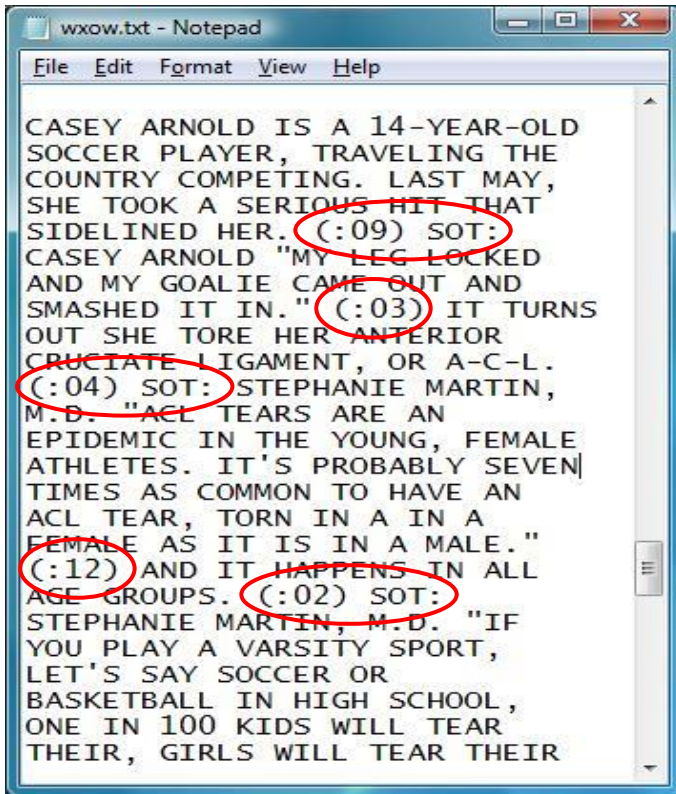

Comprompter News and Automation 608-785-7766 <http://www.Comprompter.com>

1601 Caledonia Street, Suite E La Crosse, WI 54603

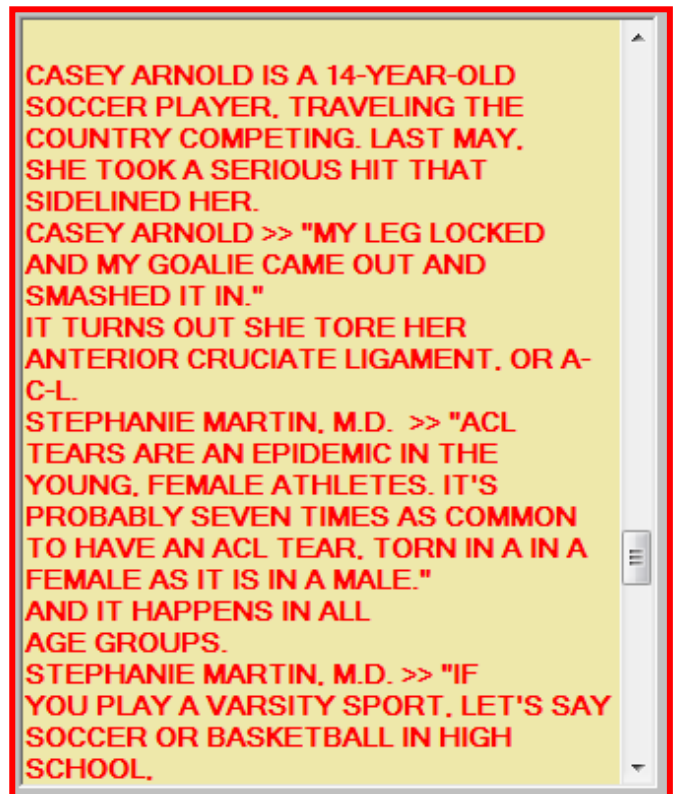

Below are two examples of the Caption Text output – one directly from a major NewsRoom Computer System; the other is the same NRCS output but fed through Comprompter Caption Central on the way to the Caption Encoder.

Which Captions would you like coming out of your station – A or C?

A (Major NRCS Output)

C (Caption Central Output)

Caption Central will remove unwanted Characters, Words and even whole Phrases from your newsroom copy prior to sending it out to your Captioner.

- Don't show your viewers your underwear ... show them your Sunday best!

Caption Central will better synchronize each Speakers Name and Text closer to your actual video so that your hearing impaired viewers get a lot more meaning from your stories.

- Don't confuse your viewers ... show them the cleanest news possible!

Improving your NewsRoom Computer System captioning is just one of the many functions performed by Caption Central.

- NRCS - Pass-through captioning from your NRCS "As Is" or have Caption Central clean it up for you!
- Voice - Feed Studio Mics directly into Caption Central for instant transcription of Ad-Libs, or Bulletins!
- Keyboard - Type in Live conversations or feed out imported text files from either local or outside sources!
- Ingest - Have Caption Central "read" and Audio file and transcribe it up to 5 times faster than real-time!
- Playback - Play back Audio files with Caption Central and have it transcribed in real-time!

The All-Purpose Captioning System ...

Designed to Meet and Exceed FCC Requirements
